

**MS. MATTANEEYA SENGPANIT**  
*Project Manager*  
**Thailand**

**I. REASONS FOR COMING**

I would like to understand rice production.

**II. HIGHLIGHTS**

The training course is very intensive and gave lots of knowledge in many angles of rice. The course coordinators and all instructors are very well-prepared. I enjoyed the course.

**III. CHARTING THE NEXT STEP**

I will have to share knowledge I got from here with other colleagues in my company who have a non-agriculture background and it will be specifically on rice cycle and how to address mechanization.

**IV. EVALUATION OF THE COURSE**

It is an intensive training class and very valuable.

**V. ADDITIONAL COMMENTS ON THE COURSE**

I would recommend for those people who are looking for some kind of training course which is overwhelming with knowledge, good participation activities, international connection on scientific approach, and practices on rice production. You will gain those from Rice: Research to Production in IRRI.
